An aerial night-time photograph of a modern, single-story house with a dark, gabled roof and light-colored vertical siding. The house is illuminated by warm, recessed lighting. To the left of the house is a large, rectangular swimming pool with a wooden deck and a person sitting on the edge. A dark-colored car is parked on a paved driveway to the right of the house. The scene is set against a dark background of trees and a night sky.

Protection

Additional protection of the house with heat shrink foil for transport

- -Protects your home from branches flying over the road (no scratches)
- -The house arrives to you clean
- -Elements of the facade exposed to strong wind will be safe (the foil creates a coating in which the blowing wind spreads across the entire wall, and does not penetrate, for example, a wall lamp)
